

DATA FOR PEOPLE

How to build equity into data processes, planning, and evaluation for wildfire adaptation and resilience projects

Join the Watershed Research and Training Center and a team of third party data equity experts for a free learning series focused on understanding how to ensure the data we use, and how we use it, advances equitable and just wildfire outcomes for the whole community. This learning series particularly applies to wildfire adaptation planning, prioritization, and evaluation, and will explore how to expand data equity for beneficial community outcomes and successful partnerships in the wildfire space.

The series will be held virtually, and include a mixture of lecture, methods and case study presentations, small group discussion, and interactive training. **Sessions will run monthly from June - September of 2023, with an optional follow up session in November. Space is limited, so apply today.**

REGISTER AT
bit.ly/PeopleDataFire

**Please note: priority is being given to grantees and subgrantees of California Department of Conservation's Regional Forest and Fire Capacity program. All other applicants will have automatic access to the first session and will be admitted for the rest of the series as space allows. Contact Maddie Smit at maddie@thewatershedcenter.com with any questions*

This work is funded in whole or in part through a grant awarded by the California Department of Conservation.

JUNE 26TH, 12:30-2:00 PDT

Data Equity Primer taught by We All Count: A laser-focused introduction to the core issues facing the equitable and ethical use of data. ***This session is open to all registrants, regardless of RFFC affiliation.****

JULY 25TH, 1:00-2:30 PDT

Spatial Planning with Community Based Data: Presenters from **Michigan State, Washington, and Oregon Universities, Aldo Leopold Wilderness Research Institute** and the **Karuk Tribe** will discuss processes and critical reasons for incorporating community data into spatial planning projects.

AUGUST 29TH, 1:00-2:30 PDT

Tribal Data Sovereignty: Speakers from **Collaboratory for Indigenous Data Governance, the Hoonah Native Forest Partnership, and Trees, Water, People** will cover various aspects of tribal data sovereignty and keys to successful and respectful partnerships.

SEPTEMBER 28TH, 1:00-2:30 PDT

Equitable Evaluation Practices: This session taught by **Camman Evaluation** will focus on how to create tailored evaluation mechanisms to increase equity throughout the lifecycle of projects.

NOVEMBER 16TH, 1:00-2:00 PDT
