# VEHICLES AND EQUIPMENT SAFETY

## Six Ways a Vehicle Can Start a Wildfire

**Exhaust Sparks** - OHVs and dirt bikes must be equipped with spark arrestors.

**Tire Pressure** - Under inflated tires may compress causing wheel to road/trail contact throwing sparks.

**Dragging Metal** - Ensure that trailer chains and other equipment are not dragging.

**Hot Engine** - Never park or drive over dry vegetation. Hot components may ignite grasses and brush.

**Brakes** - Severely worn brake pads cause metal on metal contact throwing sparks.

**Catalytic Converter** - And other exhaust components can ignite fuels they come in contact with. They can also fail and propel white-hot pieces of metal over the terrain.

# OUTREACH MINI TEACH

## Trailer Towing Safety Tips

- July is Equipment Safety Month through CWCG
  - When towing any trailer utilize the following safety considerations:
    - Chain Covers (One less spark):
    - Twist and Cross Chains:
